

We are **Duos Asinos**, a growing company founded and based in **Belgrade**. Our **partner** is a **rapidly-expanding North American**, innovative, worldwide renowned **front-runner in its industry, with a large user base**.

 Our team is growing, and **we want you to join us!**

As **DevOps Engineer**, you would **part of a 5-person team** that's responsible for managing the infrastructure used by **40 million users every day!** The team is **split into two groups, Coding and Infra**. Depending on what your preferences and strengths are, you would either be part of the Coding group or the Infra group. The platform is **hosted on AWS** and we use services like **EC2, EKS, RDS, S3, etc.**

The Coding group manages all **laC (Terraform)**, all **Ansible** scripts and **Jenkins** pipelines. The platform is about **70-80% laC** and this group's task is to **get it to 100%**.

The Infra group manages most of the other infrastructure, like **Kubernetes clusters** that are being moved from **EC2 to EKS**, containerizing new applications, managing **Load balancers**, managing **API Gateways** and ensuring all traffic is flowing smoothly.

 **Why work for us?**

- We make a **clear distinction** between **company** and **personal time**
- Aside from a few die-hards, **most** of us **work** and **will continue working from home**
- **Adaptable work hours and days** (a four-day work week is optional)
- Experienced colleagues who are willing to impart their knowledge
- Access to additional educational materials and courses

 **What else we're offering:**

- **Private health care**
- **Generous and flexible off-days**
- **Paid sick leave**
- MacBook Pro (M1 or M2) & other equipment
- Social events
- **Support for new parents**
- Opportunity to apply your skills and learn new ones

What **we're looking for:**

- Ability to perform work based on high-level requirements
- **For Coding: 2-3 years** of experience **Terraform or/and Ansible**
- Experience with **coding in Bash, Python or Perl**
- **For Infrastructure: 2-3 years** of experience with **Kubernetes**
- Experience with **AWS** services like **EC2, EKS**
- Experience with **CI/CD** tools like **Jenkins**
- Experience with **deploying Java/Spring and Node.js/React** applications
- Experience with **monitoring platforms** like **Dynatrace**
- Experience with **Git**
- Knowledge of microservice architecture
- Experience with teamwork and collaboration
- English language full proficiency is a must

Not a must, but **cool if you have it:**

- Experience with any other programming languages
- Experience in **Agile-managed development** projects
- Awareness of IT companies' Compliance and Security requirements

What's our selection process like?

First, we set up an introductory meeting, where we introduce you to Duos Asinos, project specifics, and hopefully, hear a bit about you. The next step would be a technical interview with the team lead. Afterward, you'll get an official offer from us, if both sides agree, we sign the contract for an indefinite period, and boom, we're done!

Sounds good?

If you're interested in this position, please send us your CV to resumes@duosasinos.com or apply over LinkedIn Jobs, either work.
