

We are **Duos Asinos**, a growing company founded and based in Belgrade. **Our partner** is a **North American**, innovative, **worldwide** renowned **front-runner in its industry**, with a **large user base**.

 Our team is growing, and we want **you** to **join us!**

As a **PHP Developer**, you would be responsible for **maintaining our backend services and apps that were written in PHP**, fixing bugs, implementing **new features** as well as integrating **new API endpoints for a new eCommerce platform** that's based on **ReactJS and Java (microservices)**. We also have a plan on how to **modernize the PHP backends**. We want to **split** them **into microservices**, so if you have any **experience with Laravel/Lumen, even better**. Or if you think there's a better way, tell us :)

Why work for us?

- We make a **clear distinction** between **company** and **personal time**
- Aside from a few die-hards, **most of us work and will continue working from home**
- **Adaptable work hours** and days (a four-day work week is optional)
- Experienced colleagues who are willing to impart their knowledge
- Access to additional educational materials and courses

What else we're offering:

- **Private health care**
- **Generous and flexible off-days**
- **Paid sick leave**
- MacBook Pro & other equipment
- Social events
- **Support for new parents**
- Opportunity to apply your skills and learn new ones

What we're looking for:

- Minimum **2 years** of professional **experience** as a **PHP backend developer**
- Experience with **MySQL** relational databases
- Experience with using version control tools like **GitHub** or **Bitbucket**
- **English** language **full proficiency** is a must
- Experience with **JS/JQ**
- Ability to learn new technologies
- Persistence and ability to meet deadlines

Not a must, but cool if you have it:

- Experience with **Laravel/Lumen**
- Experience with **Symfony** framework
- Experience with **micro-services architecture**
- Experience with **AWS services** and cloud technologies
- Experience with **container-based architectures** like Docker
- Experience with **JIRA/Bitbucket**
- Experience in **Agile-managed** development projects
- Experience working with US clients or customers
- Awareness of IT companies' Compliance and Security requirements

What's our selection process like?

First, we set up an introductory meeting, where we introduce you to Duos Asinos, project specifics, and hopefully, hear a bit about you. The next step would be a technical interview with the team lead. Afterward, you'll get an official offer from us, if both sides agree, we sign the contract for an indefinite period, and boom, we're done!

Sounds good?

If you're interested in this position, please send us your CV to **office@duosasinos.com** or Apply over LinkedIn Jobs, either work.
