

```
var transitionDuration = Util.getTransitionDuration($activeElement).one(Util.TRANSITION_END, function () { $(nextElement).removeClass(className); $(activeElement).removeClass(className); _this4._isSliding = false; setTimeout(function () { return $(_this4._element).trigger('slid.bs.carousel'); }, 0); }).emulateTransitionEnd(transitionDuration); } else { $(activeElement).removeClass(className); $(nextElement).addClass(className);
```

# We are looking for a SysOps Engineer

# The project

We are **Duos Asinos**. We are based in **Belgrade** and are offering a wide variety of **IT related services**.

Our **partner** is a **well-established North American** business technology and payments company, with a **century** long history and a front-runner in its industry, more than **4.5 million businesses as clients**.

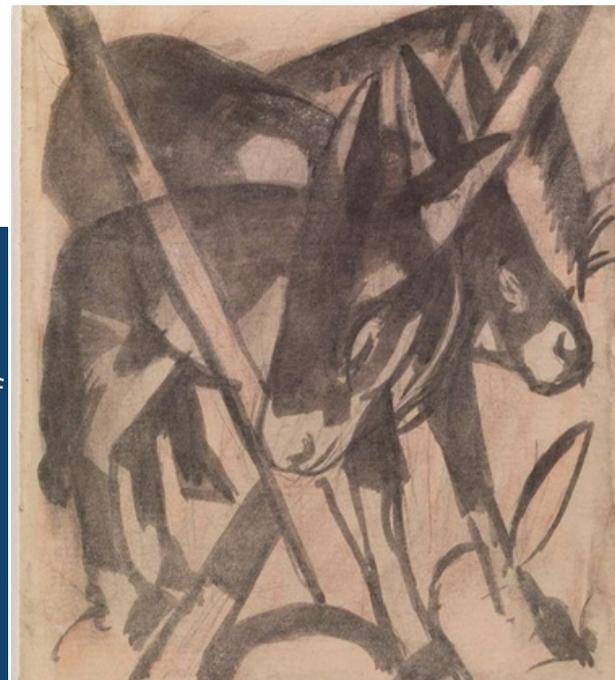

It all started in 2016 with a QA and designer team and our first client

# The job

As **SysOps Engineer**, you would **be a part of the software development team** that's responsible for developing software and managing infrastructure of an **e-commerce SaaS** platform. You would be working with teams in Belgrade, Ukraine and US. The platform is **hosted on AWS** and we use services like **EC2, ECS, RDS, S3, CloudFront, API Gateway, ELB, AWS DS, etc.**

Duos Asinos in Latin means "two donkeys", if you want to know why we picked that name, check our website.

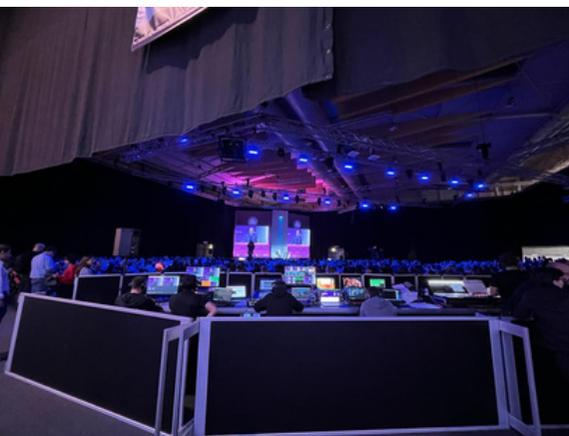

# Why work for us?

## Why work for us?

- We make a **clear distinction between company and personal time**
- Aside from a few die-hards, **most of us work** and will **continue working from home**
- **Adaptable work hours** and days

## What else we're offering:

- **Private health care**
- **Generous and flexible off-days**
- Paid sick leave
- Social events
- **Support for new parents**

We occasionally send our employees to seminars, summits and similar activities

# The skills

## What we're looking for:

- Ability to perform work based on high-level requirements
- **Working experience of 2+ years with AWS and its services**
- **Experience with Windows and Linux OS**  
(We use a lot of Microsoft software)
- Knowledge of **CI/CD** tools like **Jenkins**
- Experience with **monitoring platforms** like **Dynatrace or CloudWatch**
- **Good knowledge of networking**  
(You will be expected to set up new VPCs, Subnets, etc)
- Knowledge of microservice architecture
- Experience with teamwork and collaboration
- English Language full proficiency is a must

## Not a must, but cool if you have it:

- Experience with any security software like **Nexpose**
- Experience with hosting .NET, .NET Core and Java applications
- Experience in **Agile-managed development** projects
- Awareness of IT companies' Compliance and Security requirements

```
var transitionDuration = Util.getTransitionDuration($activeElement).one(Util.TRANSITION_END, function () { $(nextElement).removeClass(className); $(activeElement).removeClass(className); _this4._isSliding = false; setTimeout(function () { return $(_this4._element).trigger('slide'); }, 0); }).emulateTransitionEnd(transitionDuration); } else { $(activeElement).removeClass(className); $(nextElement).addClass(className);
```
