

We are **Duos Asinos**, a growing company founded and based in **Belgrade**. Our **partner** is a **rapidly-expanding North American**, innovative, worldwide renowned **front-runner in its industry, with a large user base**.

🚀 Our team is growing, and **we want you to join us!**

As **Senior Java Developer**, you would be responsible for **implementing new** and **maintaining** existing **microservices** used by our mobile and web applications for payments, authentication, content encryption and decryption. The microservices were built using **Spring Boot/Spring Cloud frameworks** using **Agile** methodologies and **processes**. Additional tasks **can include planning, collaboration, and implementation of** data migration **from the existing platforms to the new microservices** based platforms.

★ **Why** work for **us?**

- We make a **clear distinction** between **company** and **personal time**
- Aside from a few die-hards, **most** of us **work** and **will continue working from home**
- **Adaptable** work **hours and days**
- Experienced colleagues who are willing to impart their knowledge
- Access to additional educational materials and courses

 **What else we're offering:**

- **Private health care**
- **Paid sick leave**
- MacBook Pro & other equipment
- Social events
- **Support for new parents**
- Opportunity to apply your skills and learn new ones

 **What we're looking for:**

- High-level analytical skills
- **Minimum 3 years of Java/Scala/Groovy** experience with **strong emphasis** on functional (**Lambda expressions, Streams API**) and **reactive programming** techniques
- **Minimum 2 years** of experience with **Spring Boot** and **Spring Cloud**
- Experience with **Redis**
- Experience with **Spring Data**
- Experience with **Spring Security**
- Experience with Streaming Platforms (**Apache Kafka**, Apache Spark etc.)
- Experience with **AWS** services and cloud technologies
- Experience with **MySQL, Mongo DB**
- English language full proficiency is a must

 Not a must, but **cool if you have it:**

- Experience in **Salesforce** and **Salesforce Marketing Cloud**
- **Graph Databases, GIT, ELK/EFK, Docker, Kubernetes, AWS, i18n, Vault** experiences are considered assets
- Experience in **Agile-managed development** projects
- Familiar with a **Linux/UNIX development** environment.
- Awareness of IT companies' Compliance and Security requirements

💬 What's our selection process like?

First, we set up an introductory meeting, where we introduce you to Duos Asinos, project specifics, and hopefully, hear a bit about you. The next step would be a technical interview with the team lead. Afterward, you'll get an official offer from us, if both sides agree, we sign the contract for an indefinite period, and boom, we're done!

👍 Sounds good?

If you're interested in this position, please send us your CV to **resumes@duosasinos.com** or apply over LinkedIn Jobs, either works.

Only shortlisted candidates will be contacted.

All the information are held by GDPR requirements. If you don't agree with us keeping your information, you can write to hr@duosasinos.com _and it will be deleted.
